***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8-5-04 has been entered.
2. The amendment filed 8-5-04. Previously pending claims 1-15 are canceled. Claims 16-39 are newly presented and pending. The new claims are noted to be in different terms from the previously entered claims.

**Election/Restriction**

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 16-28 drawn to a method for identifying an inhibitor of NACP/ $\alpha$ -synuclein aggregation, classified for example in class 435, subclass 7.1.
  - II. Claims 29-38 drawn to a method for inhibiting NACP/ $\alpha$ -synuclein aggregation, classified for example in class 435, subclass 68.
  - III. Claim 39 drawn to a method for testing for a treatment of a neurodegenerative disease, classified for example in class 435, subclass 2.
4. The inventions are distinct, each from the other because of the following reasons:
5. Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case the different inventions result in different outcomes, for example a method for the identification of an inhibitor, a method of inhibiting NACP/ $\alpha$ -synuclein aggregation and a method of testing for a treatment of a neurodegenerative disease. The methods comprise different steps, different orders of steps, different compound reagents, have different modes of operation, different functions and different effects. Accordingly the inventions are separable and patentably distinct. The methods require different searches of the prior art and a reference to one may not necessarily be applicable to the others.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for any Group is not required for any other Group, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1647

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
